EDUCATION

National Institute of Applied Sciences and Technology (INSAT) *2022–Present*

- Final-year Industrial Chemical Engineering student, specialized in Process and Environment, with a foundation in Polymer Chemistry, Materials Science, and Organic Chemistry, complemented by Analytical Chemistry, Physicochemical Characterization, and Electrochemistry. Seeking a final-year internship (PFE).

PROFESSIONAL EXPERIENCE

SEGULA Technologies – Electrochemical Battery Modeling Internship *06/2026–08/2026*

- Modeled a **Li-ion cell** (NMC811/Graphite-SiOx) using the Single Particle Model (SPM) implemented in MATLAB.
- Optimized the mesh and diffusion coefficient values, reducing the RMSE error **from 202.13 mV to 40.5 mV**.
- Extracted and processed **experimental discharge data** from a database to validate MATLAB and COMSOL results.

Control Union – Quality Control Internship *08/2025–09/2025*

- Analyzed lubricants for viscosity and heavy metals **(ICP-OES)**.
- Prepared and interpreted **analytical reports** to verify compliance with ASTM D5185 and **ISO 17025** standards.

ETAP – Water Treatment and Petrochemistry Internship *07/2024–08/2024*

- Performed physico-chemical and ionic analyses of water samples (pH, salinity, chlorides via ion chromatography).
- Studied water treatment methods **(coagulation-flocculation, ion exchange)** for contaminant and corrosion control.
- Performed organic geochemistry techniques **(GC, GC-MS, Rock-Eval pyrolysis)** for hydrocarbon **characterization**.

ADDITIONAL EXPERIENCE

Cascade – Online Chemistry Teacher (Part-time) *2024–Present*

- Provide individualized online chemistry tutoring for French Terminale students, covering exam-level concepts.

ACADEMIC PROJECTS

Molecularly Imprinted Polymers (MIPs) in Pharmaceutical Applications

- Reviewed MIP synthesis routes: **bulk, suspension, multistep swelling, and core-shell polymerization.**
- Evaluated three drug delivery case studies: precipitation MIP for ribavirin, sulpiride-imprinted MIP, and **core-shell MOF-MIP** for doxorubicin (85% encapsulation efficiency and 48h sustained release).

Superconducting Materials: From Synthesis Routes to Structural Characterization

- Analyzed the fundamental properties of superconductors and studied elaboration routes including solid-state ceramic synthesis, crystal growth (flux, Bridgman, Czochralski), and **thin-film deposition (ALD)**.
- Reviewed characterization methods: **RAMAN, FTIR, XRD, SEM and TEM.**

Prediction of Liquid–Liquid Equilibria and Cross-flow and Countercurrent Extraction for Ternary Systems

- Formulated the LLE thermodynamic system and solved it via Rachford-Rice and **arc-length continuation**.
- Reproduced 7 Mathematica notebooks proving equivalence of the **Hunter-Nash and McCabe-Thiele** methods.

Ethylene Oxide Production Process Simulation using Aspen HYSYS

- Simulated the ethylene oxide production process using NRTL-RK thermodynamics and **Langmuir-Hinshelwood kinetics**.
- Optimized operating conditions via sensitivity analysis, achieving 96% recovery and **97.14% final purity.**

TECHNICAL SKILLS

- **Lab Techniques:** Chromatography (HPLC, GC, TLC), Spectrometry (MS, ICP-OES), Spectroscopy (NMR, FTIR, UV-Vis), Diffraction (XRD), Microscopy (SEM, TEM)
- **Simulation:** Aspen Plus, Aspen HYSYS, COMSOL Multiphysics • **Programming:** $MATLAB, Mathematica, Python$
- **Data & Office:** Pack Microsoft Office, OpenLCA • **Standards:** $ISO9001, ISO14001, ISO45001, ISO17025, ISO14040$

EXTRACURRICULAR ACTIVITIES

- **IEEE INSAT** – Chair of EMBS; Organization team leader of TRSYP 3.0; Social activities manger of MENASYP
- **THEATRO INSAT** – Member of the dancing team

LANGUAGES

English (Advanced) French (Advanced) Arabic (Native)

CERTIFICATES

Aspen HYSYS – MATLAB
